Introduction

Thank you for purchasing this quality product. **To minimize the risk of injury by means of fire or electric shock we urge that our clients take some basic safety precautions when using this device. Please read the operation instructions carefully and make sure you have understood its content.**

Always use a grounded power connection with the appropriate mains voltage. You can find the corresponding mains voltage on the type plate. If you have any doubts about the connection being grounded, have it checked by a qualified professional. Never use a faulty electric cable.

Do not inspect the electrical part of the pressure pond filter in a wet or damp environment or when you are wet yourself and protect it from direct sunlight. Install this device in a safe location so that nobody can step on the cable, fall over or damage it. Disconnect the power plug before cleaning it and use only a damp cloth for cleaning. Avoid using cleaning agents and make sure that no liquid enters the electrical part of the pump.

The electric part of the device contains no parts that can be inspected or serviced by the user. Leave the maintenance, adjustment and repair to qualified technical personnel. In case of unauthorised intervention the 2-year warranty is no longer valid! Keep these operation instructions safe.

Safety guideline

BEWARE:

The use of this device is allowed only with fault current protection switch with a triggering nominal current up to 30mA (according to VDE 0100 Article 702 and 738).

The device is not intended for use by persons (including children) with impaired or limited physical, sensory and mental abilities or lack of experience and/or real knowledge, unless they are supervised by a person responsible for their safety or the follow the instructions, made by this person on how to use the device correctly.

Children should be supervised to make sure that they do not play with the device.

ATTENTION:

- Run a visual inspection of the device before every use. Do not use the device if the safety appliances are damaged or worn out. Never override safety regulations.
- Use the device exclusively according to the intended purpose stated in the instructions for use.
- You are responsible for the safety of the working environment.
- If the cable or the plug is damaged due to external influences the cable must not be repaired! It has to be replaced with a new one. This work can be carried out only by an electrician.
- Never lift, carry or fixate the device by using the power cable.
- Make sure that the electrical plug connection is placed in a flood-proof area and is protected from moisture.
- Disconnect the mains plug before starting the maintenance work at the compressor.
- The user is responsible for complying with the location specific safety and mounting regulations (you can ask an electrician)
- In case of device failure the repairs can be carried out only by an electrician or by the WilTec-repair service.

SAFETY GUIDELINES:

- The user should choose the right compressor with the appropriate air volume and air pressure to correspond to the actual work requirements.
- Never expose the device to dust, acid, steam, explosive or flammable gases or atmospheric influences (rain, sun, fog, snow).
- Never use the compressor barefoot or with wet hands or feet.
- Never allow children to touch the switched-on compressor or to insert the plug. It may cause burns or electric shocks.
- Do not open or damage any part of the compressor. If necessary please contact your seller.
- Release the water by opening the drain valve. Always do so before not using the compressor for a long time. Store the compressor in a well ventilated place.
- Always wear goggles. Under no circumstances should you direct the airflow towards your body or other persons' bodies.
- Never use in areas with steam or moisture or close to water.
- Switch off the compressor if you do not use it. Disconnect from mains before you repair, recondition, maintain, clean or replace parts. Never use the power cable as handle. Keep the power cable away from hot objects, oil and sharp edges. Protect it against breakage. Do not pull the power cable in order to unplug it from the power socket.
- Do not store the compressor with the plug inserted into the plug. Do not allow children or any other people who are not able to handle this device to play or work with it.
- Be very careful when you are working with the compressor. Do not use it if you are tired. Persons under the influence of alcohol, drugs or medication are not allowed to use this device.
- When you start working make sure that all screws are tightened.

- Do not use the compressor if it is damaged. If the compressor generates unusual noises and strong vibrations or if other unusual signs occur that indicate some damage you should turn off the compressor immediately. For repairs please use only original spare parts. Do not make any technical modifications to the compressor. In case you cannot eliminate the malfunction hand over the device to your seller.

SAFETY REQUIREMENT FOR USER

1. When use a new battery for the first time or after long term storage, please fully charge the battery before use.
2. Use the correct charger for Ni-MH battery.
3. Don't reverse charge battery.
4. Don't short-circuit battery, permanent damage to battery may result.
5. Don't incinerate or mutilate battery, may burst or release toxic material.
6. Don't solder directly to cells or battery, please store battery in a cool dry place.
7. Don't mix battery with other battery type, or battery of a different chemistry, such as alkaline and zinc carbon.
8. When not using a battery, disconnect it from the device.
9. When find battery power down during use, please switch off the device to avoid over-discharge.
10. In order to extend the battery life, please to charge before keeping. Advice to discharge at least one time every three months prevent automatic discharge.
11. This airbrush compressor suitable for indoor use only, to prevent health damage, never use at high temperature, wet location!
12. The product must used in dry, indoor locations. Do not spray noxious, flammable, explosive material.
13. Unplug a battery by holding the connector it from the device.
14. If don't use this product in right way, it will damage the airbrush compressor, battery, or hurt user.
15. If there is something unusual happens, please disconnect the device and power supply immediately.
16. If any accessory is damaged, please take it to wholesaler or professional repair shop, do not try to repair by oneself.
17. Please keep the airbrush compressor and battery in clean, dry and do not expose the product or its accessories in the sun or to the temperatures high than 35°C.
18. The product is not a toy and must be kept out of the reach of children. There is an electric shock hazard if connect the power plug in a wrong way.

Features :

1. Suitable for airbrush guns with a nozzle diameter of 0.2-0.5mm.
2. Perfect for makeup and other cosmetic applications.
3. Optional battery or AC adapter operation
4. Autostop function
5. Immediately ready to start and continuous work possible.
6. Adjustable working pressure
7. With carrying bag for comfortable mobile working.
8. Integrated airbrush gun holder 360 ° swiveling
9. LED changes from red to green when the battery is fully charged

Specification

| | | | |
|------------------|-----------------------|-------------------|-------------|
| Volt Hz Input AC | 220-240V / 50Hz/ 0.6A | Volt Hz Output AC | 12V / 1.6A |
| Flow | 10.5l/min | Working Pressure | 2-12psi |
| Maximal Pressure | 35psi/ 2.5Bar | Size | 11x10x5,6cm |
| Weight | 1,13kg | | |

Model and Part list Product include:

Air compressor HS08 x 1
Air hose x 1
Airbrush x 1
Adapter x 1

Operation Direction:

1. Notes Operation with mains adapter: Insert the plug of the power supply into the designated connection of the compressor and connect the mains adapter to the power supply. Use the appropriate compressor cover.
2. Connect the tubing to the compressor and connect to the minifilter (optional - not included depending on version). Connect the airbrush gun.
3. Press the red button to start the operation. The LED changes color from red to green. The compressor stops when the airbrush gun is no longer used. Turn off the compressor when not in use.
4. Turn the dial clockwise or counterclockwise to adjust the pressure.
5. The compressor is designed for continuous work.
6. The automatic overheat protection will shut off the unit if the temperature is too high and will be reset after the motor has cooled down.
7. The airbrush gun holder is 360 ° swiveling for a comfortable working.

Disposal regulations

EU guidelines regarding the disposal of scrap electric appliances (WEEE, 2012/19/EU) were implemented in the law related to electrical and electronic equipment and appliances.

All WiITec electric devices that fall under the WEEE regulations are labelled with the crossed-out wheeled waste bin logo. This logo indicates that this electric equipment must not be disposed with the domestic waste.

The company WiITec Technik GmbH has been registered in the German registry EAR under the WEEE-registration number DE45283704.

Disposal of used electrical and electronic appliances (intended for use in the countries of the European Union and other European countries with a separate collection system for these appliances).

The logo on the article or on its packaging points out that this article must not be treated as normal household waste but must be disposed to a recycling collection point for electronic and electrical waste equipment. By contributing to the correct disposal of this article you protect the environment and the health of your fellow men. Environment and health are threatened by inappropriate disposal.

Materials' recycling helps reduce the consumption of raw materials.

Additional information on recycling this article can be provided by your local community, municipal waste disposal facilities or the store where you purchased the article.
