Introduction

Thank you for purchasing this quality product. **To minimize the risk of injury by means of fire or electric shock we urge that our clients take some basic safety precautions when using this device. Please read the operation instructions carefully and make sure you have understood its content.**

Always use a grounded power connection with the appropriate mains voltage. You can find the corresponding mains voltage on the type plate. If you have any doubts about the connection being grounded, have it checked by a qualified professional. Never use a faulty electric cable.

Do not inspect the electrical part of the pressure pond filter in a wet or damp environment or when you are wet yourself and protect it from direct sunlight. Install this device in a safe location so that nobody can step on the cable, fall over or damage it. Disconnect the power plug before cleaning it and use only a damp cloth for cleaning. Avoid using cleaning agents and make sure that no liquid enters the electrical part of the pump.

The electric part of the device contains no parts that can be inspected or serviced by the user. Leave the maintenance, adjustment and repair to qualified technical personnel. In case of unauthorised intervention the 2-year warranty is no longer valid! Keep these operation instructions safe.

Safety guideline

BEWARE:

The use of this device is allowed only with fault current protection switch with a triggering nominal current up to 30mA (according to VDE 0100 Article 702 and 738).

The device is not intended for use by persons (including children) with impaired or limited physical, sensory and mental abilities or lack of experience and/or real knowledge, unless they are supervised by a person responsible for their safety or the follow the instructions, made by this person on how to use the device correctly.

Children should be supervised to make sure that they do not play with the device.

ATTENTION:

- Run a visual inspection of the device before every use. Do not use the device if the safety appliances are damaged or worn out. Never override safety regulations.
- Use the device exclusively according to the intended purpose stated in the instructions for use.
- You are responsible for the safety of the working environment.
- If the cable or the plug is damaged due to external influences the cable must not be repaired! It has to be replaced with a new one. This work can be carried out only by an electrician.
- Never lift, carry or fixate the device by using the power cable.
- Make sure that the electrical plug connection is placed in a flood-proof area and is protected from moisture.
- The user is responsible for complying with the location specific safety and mounting regulations (you can ask an electrician)
- In case of device failure the repairs can be carried out only by an electrician or by the WilTec-repair service.

SAFETY GUIDELINES:

- The user should choose the right compressor with the appropriate air volume and air pressure to correspond to the actual work requirements.
- Never expose the device to dust, acid, steam, explosive or flammable gases or atmospheric influences (rain, sun, fog, snow).
- Never use the compressor barefoot or with wet hands or feet.
- Never allow children to touch the switched-on compressor or to insert the plug. It may cause burns or electric shocks.
- Do not open or damage any part of the compressor. If necessary please contact your seller.
- Release the water by opening the drain valve. Always do so before not using the compressor for a long time. Store the compressor in a well ventilated place.
- Always wear goggles. Under no circumstances should you direct the airflow towards your body or other persons' bodies.
- Never use in areas with steam or moisture or close to water.
- Switch off the compressor if you do not use it. Disconnect from mains before you repair, recondition, maintain, clean or replace parts. Never use the power cable as handle. Keep the power cable away from hot objects, oil and sharp edges. Protect it against breakage. Do not pull the power cable in order to unplug it from the power socket.
- Do not store the compressor with the plug inserted into the plug. Do not allow children or any other people who are not able to handle this device to play or work with it.
- Be very careful when you are working with the compressor. Do not use it if you are tired. Persons under the influence of alcohol, drugs or medication are not allowed to use this device.
- When you start working make sure that all screws are tightened.
- Do not use the compressor if it is damaged. If the compressor generates unusual noises and strong vibrations or if other unusual signs occur that indicate some damage you should turn off the compressor immediately. For repairs please use only original spare parts. Do not make any technical modifications to the compressor. In case you cannot eliminate the malfunction hand over the device to your seller.

Thank you for purchasing our company's products- Mini Air Compressor HS07-3/HS08-3, please read the instruction manual carefully before using.

The products are suitable for makeup, cosmetics, tattoo, craftwork, toys and cake decorating in the field of spray painting art.

Common characteristics of Mini Air compressor:

1. Environmental design, no oil lubrication, the air source without oil pollution, and no noise interference.
2. Different structure according to the different requirements of the gasification, different air displacement compressor to choose from according to different pressure.
3. Electronic pressure regulating mode, working pressure adjustable, output pressure, air flow stability, and can work continuously.
4. Various of panel display:
 - 1) Switch button with lamp and pressure regulating button with lamp show the red light after be energized.
 - 2) three pressure regulating indicator lights shows high, middle and low air pressure.
5. Airbrush holder on the machine cover, beautiful and practical, convenient operation.
5. Beautiful shape, micro compact, easy to carry.
6. Air hose, with very good elasticity, flexibility and good touch feeling.
7. Plugs for different countries, world general adapter, can also configure DC 12V battery for power supply.
8. Products have got global authentication and patent protection.

Specification

Volt Hz Input AC	220-240V / 50Hz/ 0.6A	Volt Hz Output AC	12V / 1.6A
Flow	10.5l/min	Working Pressure	2-12psi
Maximal Pressure	35psi/ 2.5Bar	Size	11x10x5,6cm
Weight	1,13kg		

Operating instruction:

1. First, put the airbrush, air hose and air compressor together, choose the single action (direct gas type) airbrush to support.
2. Insert the plug, which is at the end of the adapter wire, into the power socket of the air compressor, then connect the plug of adapter and the plug of alternating current, then the three pressure regulating indicator lights turn on and adjustable button turn light, the electricity power on..
3. Press the ON/OFF KEY once, the air compressor start to work, at the same time the three pressure regulating indicator lights turn on, the air compressor is at the highest pressure file, press the ON/OFF KEY once more, then the three pressure regulating indicator lights turn off. at the same time.
4. When the air compressor is operating, every time to press the MODE button, the internal integrated circuit change the input pressure, to give power supply of the air compressor's high, middle and low voltage , and lead the high, middle and low speed of the machine., to realize high, middle and low pressure and air displacement, to reach the purpose of pressure adjustable, at the same time of adjust the pressure, the three indicator lights show in turn at 3, 2, 1.
5. When the air compressor is not used in a long period, the adaptor should be pulled away from the power.

Disposal regulations

EU guidelines regarding the disposal of scrap electric appliances (WEEE, 2012/19/EU) were implemented in the law related to electrical and electronic equipment and appliances.

All WilTec electric devices that fall under the WEEE regulations are labelled with the crossed-out wheeled waste bin logo. This logo indicates that this electric equipment must not be disposed with the domestic waste.

The company WilTec Technik GmbH has been registered in the German registry EAR under the WEEE-registration number DE45283704.

Disposal of used electrical and electronic appliances (intended for use in the countries of the European Union and other European countries with a separate collection system for these appliances).

The logo on the article or on its packaging points out that this article must not be treated as normal household waste but must be disposed to a recycling collection point for electronic and electrical waste equipment. By contributing to the correct disposal of this article you protect the environment and the health of your fellow men. Environment and health are threatened by inappropriate disposal.

Materials' recycling helps reduce the consumption of raw materials.

Additional information on recycling this article can be provided by your local community, municipal waste disposal facilities or the store where you purchased the article.
