Introduction

Thank you for choosing to purchase this quality product. To minimise the risk of injury, we ask you to always take some basic safety precautions when using this product. Please read this operating manual carefully and make sure that you understand it. Keep these operation instructions in a safe place.

Scope of delivery

2× key
4× screw
4× dowel
4× spacer

Information

The installation material included is suitable for strong masonry, e.g., concrete walls or brickwork. Check – before installing the letterbox – if the installation material is appropriate for your masonry. Use other installation material if necessary.

Mounting

1. Choose the right position for your letterbox, if possible, it should be weatherproof.
2. Mark the holes to be drilled.
3. Drill the holes for the dowels.
4. Completely insert the dowels into the holes.
5. Now install the letterbox. Be sure to use the spacers to ensure that the letterbox can be opened properly.

 **Note:** The spacers used may create the impression that the screws are not tight enough. Please ensure that you do not compress them too much during assembly, otherwise the mailbox cannot be opened properly. If this is the case, loosen the screws again a little.

Changing the numerical code

1. The original code is "000."
2. Open the door and turn the button to the "B" position.
3. Modify the code.
4. Turn the button to the "A" position.
5. Done.

Important Note:

Reproduction and any commercial use (of parts) of this operating manual, requires a written permission of WilTec Wildanger Technik GmbH.
