Introduction

Thank you for purchasing this quality product. **To minimise the risk of injury we urge that our clients take some basic safety precautions when using this device. Please read the operation instructions carefully and make sure you have understood its content.** Keep these operation instructions safe.

Fasten the metal mounting to the wall or ceiling with screws.

1. Drill 4 M8 holes into the wall to match the holes located in the mounting bracket.
2. Connect the hose reel to the mounting bracket with the pivot pin. It is recommended to install the mounting bracket 0.5 m from the floor.
3. Pull the hose. It has 2–3 lock positions per meter.
4. Please do not pull the hose after it has entirely been pulled out. Otherwise, it might retract suddenly.
5. Please hold the nozzle when the hose is in retraction until it is finished.

Troubleshooting

The most common malfunction is that the hose cannot be retracted automatically after being fully extended. The reason may be that the hose end is locked as the stop-anywhere mechanism stays in the locking point and there is no further hose to be pulled out for release.

There are two ways to solve this:

1. Hold the hose and the yellow mark and pull it with a jerking motion until the hose retracts again.
2. Place the hose reel with its right side down. Pull the hose until it retracts again.

Technical data

Item №	Hose length (m)	Hose material	Working pressure (bar)	Temperature (°C)	Outer casing material	Size of inlet (inch)
60326	15	PVC	8	-5-45	PP	¼
