Introduction

Thank you for purchasing this quality product. **To minimize the risk of injury we urge that our clients take some basic safety precautions when using this device.** Please read the operation instructions carefully and make sure you have understood its content. Keep these operation instructions safe.

General information

- Read and keep operating instructions
 - This instruction manual is included with this automatic hose reel. It contains important information on commissioning and handling.
 - To facilitate the comprehension of this manual, the automatic hose reel is referred to below only as a "hose reel." Read the operating instructions, especially the safety instructions, carefully before using the hose reel. Failure to follow these operating instructions may result in serious injury or damage to the hose reel.
- Keep the operation manual for future reference. If you give the hose reel to a third party, be sure to include these operating instructions.

Intended use

- The hose reel is designed exclusively as a hose reel in a closed hose box with automatic rewind. In addition to the spray nozzle, other water consumers can also be connected to the irrigation hose, such as lawn sprinklers, irrigation systems and high-pressure cleaners.
- The hose reel is intended for private use only and is not suitable for commercial use.
- Use the hose reel only as described in these operating instructions. Any other use is considered improper and may result in property damage or even personal injury.
- The hose reel is not a toy for children. The manufacturer or dealer accepts no liability for damage caused by improper use.

Safety instructions

Risk of electric shock!

- Incorrect installation or use can lead to electric shock.
- Make sure that you do not damage any power lines during installation.
- Never direct the water jet at electrical equipment.
- Never direct the water jet at persons or animals.

Risk of injury!

- There is a danger to children and persons with reduced physical, sensory or mental abilities (e.g., partially disabled persons, elderly persons) or lack of experience and knowledge (e.g., elderly children).
- Make sure that only persons use the hose reel who are at least 16 years old, are in full possession of their physical and mental abilities and have read and understood the operating instructions. All other persons may only use the hose reel under the supervision of suitable persons.
- Keep children away from the hose reel. Children must not use the hose reel or play with it.
- Do not leave the hose reel unattended during use.
- Keep children away during assembly. This hose reel includes screws and other small parts. These can cause suffocation if swallowed or inhaled.
- Do not allow children to play with the packaging film. Children can get caught and suffocate while playing.
- Risk of injury!
- Incorrect installation or use can lead to injuries.
- Make sure that all parts are undamaged and properly assembled. Improper installation may result in injury. Damaged parts can affect safety and function.

- The water pressure must be checked properly to prevent water escaping at high pressure and causing injury. Do not point the water jet at persons or animals.
- Hose reels are designed to carry water from fixed installations. It must not be used to carry other liquids. Never drink the water that you transport with the hose reel. The hose reel is not suitable for drinking water.
- Lay the unrolled hose flat on the floor only. Avoid loops standing up. Loops are tripping hazards and can lead to accidents.
- Do not let the hose fall back on its own. Carefully guide it back into the housing.
- Do not release the hose if the automatic stop function is not engaged.

Danger of slipping!

- If the floor is wet, you may slip on the floor and injure yourself.
- Make sure that the floor near the hose reel is kept as dry as possible.
- Turn off the water tap when the hose reel is not in use.

Risk of damage!

- Improper handling of the hose reel can lead to damage.
- Make sure that you do not damage any cables, lines, or water pipes during installation. Search the installation site with a line finder before drilling. To prevent frost damage, remove the hose reel from the wall in winter and store it in a dry place.
- Do not run the hose around corners or edges or along pointed or sharp-edged objects. The resulting damage can lead to leakage.
- Do not lay the hose in areas that are used by vehicles. Running over the hose can cause it to burst.
- Do not open the hose reel housing. The springs are pre-tensioned, they can spring back.
- Do not remove any screws from parts of the housing.
- Make sure that the hose does not rewind itself. This can lead to damage.
- Do not close the hose opening with your fingers or objects during use.
- Do not use the hose reel if the plastic components of the hose reel have cracks or cracks or have deformed. Replace damaged components only with suitable original spare parts.

Proper operation

1. Attach the threaded tap connector to your tap and connect the hose reel in to the tap, using the supplied tap to reel hose.
2. To operate, pull the hose out and stop pulling at any desired length. The hose will automatically lock in this position.
3. To further lengthen the hose, resume pulling.
4. To re-coil the hose, give a short pull to release the lock and the hose will automatically begin to retract. To stop the hose, give a short pull to lock again.
5. When retracting, keep hold of the hose and walk towards the reel until the hose is fully retracted. Letting go of the hose could result in injury.
6. It is recommended that you turn the water off at the tap before retracting the hose.

Maintenance

- Always tidy the hose after use.
- When not in use for long period, it is advisable to store your hose in a covered area.

Technical data

Model	Item №	Hose length (m)	Hose material	Max. work pressure (bar)	Inner hose diameter (mm)
NW-A10	61125	10	PVC	24	12.5 (½")
NW-A20	61090	20			
NW-A30	61124	30			

Parts list

№	Name	№	Name
1	Wall mounting bracket	3	Trigger spray gun
2	Pivot bar	4	Wall bolts and plastic anchors

Main features

CUBE HOSE REEL

8-10s Slow Retraction Time For 20m Hose

No Screw Design

Constant Force S- Spring
Stainless Steel Material

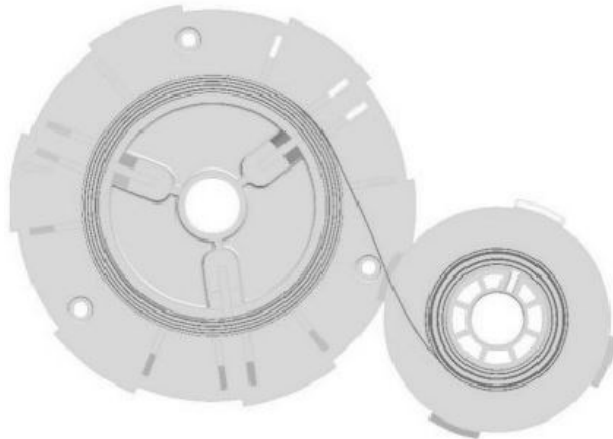

2 in 1 Wall & Ground Mounting

- Slow return function:**
 This water cube hose reel has an integrated brake to slow the retraction speed of the hose. The hose will be retracted back to the reel slowly to ensure that the operator and any bystanders can use the reel without having a risk of injury.

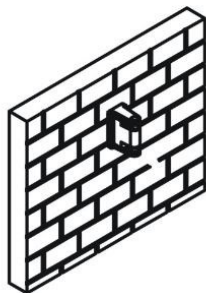

- **Screw-less design:**
The outer case consists of 3 parts – main body, left cover, and right cover. The left and right covers are locked onto the main body via snap-fit to ensure that there are no screws on the surface of the hose reel.
- **Constant force stainless steel spring:**
The hose reel works with a constant force stainless steel spring, which will never get rusty, even after long periods of usage. The hose can be pulled out easily from the beginning to the end when watering the garden.

Constant force spring

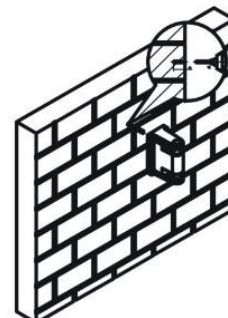

Wall and ground mounting

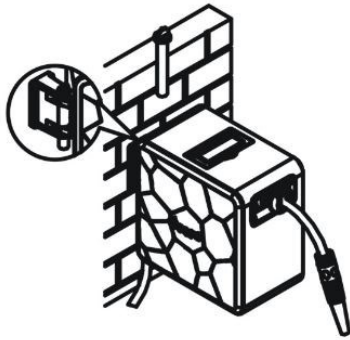

The hose reel can be mounted to the wall as any traditional hose reel with four bolts after you have drilled 4 holes in the wall.

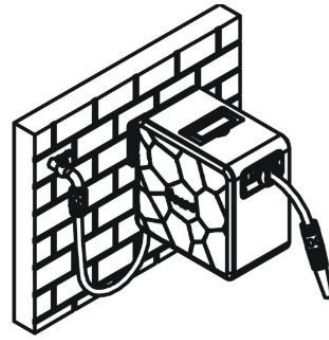

1. Choose the required position and mark 4 holes on the wall with the help of the bracket.

2. Drill the holes marked and fix the wall bracket to the wall with the provided bolts.

3. Connect the hose reel and bracket with the fitting tube.

4. Attach the tap connector to the tap and connect the inlet hose and tap adaptor.

To make the use of the hose reel as easy as possible, even in the garden, it comes with a ground mounted base which ensures that the hose reel can be mounted on the grass with 4 metal hooks.
