Introduction

Thank you for choosing to purchase this quality product. To minimise the risk of injury, we ask you to always take some basic safety precautions when using this product. Please read this operating manual carefully and make sure that you understand it.
Keep these operation instructions in a safe place.

The mini kayak hanger is a quick and easy solution for storing your kayak. These easy-to-mount wall hangers are made with strong heavy-duty powder-coated steel with foam paddling to protect the surface of your kayak. The hangers come with mounting bolts for simple installation. The wall hanger is the ideal way to keep your kayak off the ground and out from underfoot. Thus, you avoid damaging the finish surface of your kayak on rough cement garage floors or sandy porches. The wall hanger is easy to install. Just follow these instructions:

- Find a safe place where your kayak is protected from damage from swing doors or falling objects such as rakes, shovels, and other tools found in most garages and warehouses. Keep the area under the wall brackets of the kayak free to prevent accidents while it is being carried, lowered, or hung up, and allow sufficient space to lift the kayak if necessary. Do not mount the hooks at a height that you cannot reach; lift the kayak over the hook ends.
- Thick wooden beams are best for attaching the brackets. It is important that the screws in the top two holes are firmly embedded in the beam. If you have thick drywall or plastered walls, you may need to purchase longer screws. The holes on the base plate are not required for installation in wood. It is their purpose to prevent the hooks from moving from side to side. Make sure that you use the wall anchors provided.

Note: Make sure that there is enough space left between the hangers so that the narrow ends of the kayak tips can be put onto the hooks.

Tip: To make it easier to hang the kayak up, tip it slightly. When one end is securely put onto the hook, lift the other end into the other hook. Remove the kayak just like that.

Caution: Do not place or remove the kayak from a ladder or stool. Property damage and serious injury can result if you fall off the ladder or stool.

Important Note:
