Introduction

Thank you for purchasing this quality product. **To minimise the risk of injury we urge that our clients take some basic safety precautions when using this device. Please read the operation instructions carefully and make sure you have understood its content.**

Keep these operation instructions safe.

Operating instructions

- Do not run the compressor for more than 10 min at a time. If you need to use it for longer, turn it off and let it rest for at least 10 min before starting it again.
- This compressor is not designed for inflating high pressure tires such as used on trucks, trailers or tractors.
- When running at more than 3 bar (45 psi), do not operate the tool for more than 7 min.
- When using the compressor, never leave it unattended.

Inflating tyres

1. Move the vehicle so that the valve is in the bottom and its closest position to the ground. Place the air compressor next to the tire.
2. Plug the power cord into the cigarette lighter receptacle.
3. Place connector on valve stem and firmly push down, close the thumb latch.
4. When the desired pressure is reached, unplug the power cord.
5. Remove adaptor from tire valve, remove the power cord from the cigarette lighter.
6. Always leave the thumb latch in the open position when storing the compressor.

Inflating other inflatable objects

Sports adaptor

Adaptors for mattresses,
rubber boats, etc.

Lock valve stem connector

- Select the suitable adaptor and insert it into the connector. Close the thumb latch.
- Check the owner's manual on the article to be inflated for the exact pressures.
- Insert the adaptor into the article to be inflated.
- Plug in the power cord into the cigarette lighter receptacle.
- When the desired pressure is reached, unplug the power cord.
- Remove the adaptor from the inflated article. Remove the adaptor from the connector. Remember to leave the thumb latch in opened position when storing it.
- Always check the item being inflated with the proper pressure gauge. Avoid excessive pressure on low pressure objects.

WARNING: Avoid over-inflating. Never exceed the recommended pressure. Items being over-inflated may burst and can cause serious injury.

Troubleshooting

Compressor does not start or blows fuses:

- Push the power plug firmly into the receptacle and twist it back and forth.
- Check receptacle and plug terminals for dirt. Use a non-conductive probe and no fingers or metal to clear.
- Check lighter fuse. This should be 15 A minimum.
- Check if the power cord is properly plugged in.

Compressor runs but does not inflate:

- Be sure the connector is on the valve stem as far as possible before closing the thumb latch.
- Check article for leaks.
- Check hose for breaks and leaks at fittings.

Compressor runs slowly:

- Overheated from excessive use. Unplug the power cord and leave the compressor to cool down for at least 30 min.
- Voltage too low. Check condition of battery.

CAUTION

- This compressor is capable of inflating to 17 bar (250 psi). To avoid over inflation the user must strictly follow operating instructions as required and described. Do not exceed the recommended pressure at any time. Never leave the unit unattended while operating it!
- The compressor should be kept out of reach of small children.
- Ensure that the connector is screwed into the valve stem until it looks firmly in place.

Disposal regulations

EU guidelines regarding the disposal of scrap electric appliances (WEEE, 2012/19/EU) were implemented in the law related to electrical and electronic equipment and appliances.

All WiITec electric devices that fall under the WEEE regulations are labelled with the crossed-out wheeled waste bin logo. This logo indicates that this electric equipment must not be disposed with the domestic waste.

The company WiITec Technik GmbH has been registered in the German registry EAR under the WEEE-registration number DE45283704.

Disposal of used electrical and electronic appliances (intended for use in the countries of the European Union and other European countries with a separate collection system for these appliances).

The logo on the article or on its packaging points out that this article must not be treated as normal household waste but must be disposed to a recycling collection point for electronic and electrical waste equipment. By contributing to the correct disposal of this article you protect the environment and the health of your fellow men. Environment and health are threatened by inappropriate disposal.

Material recycling helps reduce the consumption of raw materials.

Additional information on recycling this article can be provided by your local community, municipal waste disposal facilities, or the store where you purchased the article.
